

Liquid Ionic Kelp from Laminria Digitata

Innotech Nutrition has developed a whole food Liquid Ionic Kelp™ complete with naturally sun-fed Cranberry juice powder and Organic Kelp from the order Lamanaria Digitata. It is a variety of kelp that grows prolifically in the subtidal waters of the North Atlantic. Digitata Kelp tends to contain higher amounts of iodine, calcium, potassium and iron than other species of kelp.

With the addition of naturally grown Cranberry juice, Liquid Ionic Kelp™ contains over 65 different Vitamins, Minerals, Trace Minerals, Amino Acids, Bioflavinoids, Antioxidants and Digestive Enzymes.

Why Ionic?

Our proprietary process ensures maximum absorption, while the balanced liquid formula provides safety and flexibility. Every cell has an electrical potential difference across its membrane. By making the solution Ionic, it allows for the nutrients to be absorbed into the membrane without going through the whole digestive process.

Why waste money on other inferior Kelp formulations which can't deliver the same absorption abilities?

What do Kelp and Cranberries contain and what is it good for?

The magic mineral that naturally occurs in Kelp and Cranberries is Iodine! Iodine is a trace mineral essential for a healthy functioning thyroid gland. The thyroid gland is one part of the endocrine system which is primarily responsible for the regulation of many hormones in the body. Proper intake of iodine ensures the thyroid is able to manage metabolism, detoxification, brain development and healthy growth.

About 25 percent of the iodine in the body is stored in the thyroid gland, showing the importance of an adequate intake of iodine to prevent any abnormal functions of the thyroid.

Some conditions linked to low iodine include: ADHD, pregnancy loss, multiple sclerosis, Alzheimer's disease, Parkinson's disease, enlargement of the thyroid gland, lethargy, fatigue, weakness of the immune system, slow metabolism, autism, weight gain and possibly even mental states such as anxiety and depression. Innotech Nutrition's Liquid Ionic Kelp™ is the whole food answer to satisfying your Iodine needs. With the growing popularity of diets that deliberately exclude iodized salt and iodine-rich foods, like dairy, it is essential to include it in your daily routine.

Furthermore, with over 65 nutrients, Liquid Ionic Kelp™ supports your overall health and metabolic function. This unique blend gives the body the type of vitamins, minerals and other nutrients it readily recognizes while absorbing quickly due to the liquid ionic state.

Recommended Purpose: Helps in the function of the thyroid gland and to prevent iodine deficiency.

Recommended Dose (adults): Take 1 tablespoon (15 ml / 1/2 oz.) per day. Shake well, and refrigerate after opening.

Ingredients: Organic Kelp (Laminaria Digitata), Cranberry Juice Powder (Vaccinium macrocarpon Aiton), Distilled Water, Vitamin C (Ascorbic Acid), Citric Acid (non-gmo corn), Apple Cider Vinegar, natural Acai flavour, Beet juice powder, Stevia extract.
